CYBER WARFARE

FIGHTING TOMORROW'S WARS TODAY

Meet the Realities of Virtual War.

Welcome to cyberwarfare, where changing strategies, emerging tools and technologies, and a rapidly-shifting political landscape have rewritten the rules of conflict.

A new generation of tools has created a new line of battle. In the past year, DDOS attacks began to use large groups of unsecured IoT devices.

Threats include more than surveillance and extortion, with targets ranging from critical infrastructure to psychological operations against large groups.

We will discuss a number of questions, including: why do these cyberattacks take place? Who conducts these attacks? How do these attacks happen? What risks do ordinary citizens face, and what can they do?

Get Suited Up. Join us at Mid-America Club IT Connect at **6:00 pm** on **March 20, 2018**. Enjoy a presentation from a thought-leader in tech and our spirited Q&A!

Speaker: *Michelle Stalling, CISSP, CRISC, CISA, Senior Information Assurance Manager at Ensono.*

Michelle has 20+ years project management and information security. Her experience includes GRC, Risk Management, ISMS, BCMS/DR, and Resiliency and Analysis.

MID-AMERICA CLUB IT CONNECT MEETINGS

Our next meeting will be **March 20, 2018** at **6:00 pm** in the Mid-America Club on the 80th floor of the Aon building in downtown Chicago. Please RSVP with the Club at **312-861-1100** or online at **midamclub.com**. Limit **3 guests** per membership. Members must register their guests with the Membership Department.

Mid-America Club IT Connect is presented by **Polymorphic Systems, Inc.**
